FOUR PUBLISHED TIPS ON SELECTING YOUR REMODELER-----.

- Can they prove experience? Make sure they have the track record necessary to truly learn the complexities of custom construction and remodeling. Kitchens are not easy and requires an experienced Company at the helm.
- Are they familiar with the current trends and improvements in the market. Can they properly advise you on the best materials to use for your new kitchen, bath or remodel? Are they skilled at design (key to the success of your new kitchen or remodel project).
- How many references can the contractor you are considering produce for you? They should have many names for you to call if indeed they have the background and experience. Nothing takes the place of a history of satisfied clients!
- Will they bring to the job qualified sub-contractors and workmen who are skilled in their trade. Will they assure you that your property will be cared for during construction. Lastly, can they give you an unconditional one year warranty?
